Powys Pupil Destinations 2011

INTRODUCTION

This report outlines destination data for the Powys Unitary Authority area. Careers Wales gathers information on all Year 11, 12 and 13 pupils, including special schools, and produces these figures, based on their destination as at 31st October 2011.

NB: Unfortunately, the report does not have data on young people who have been attending full-time college courses.

This year's report includes:

- Comments, graphs and figures for the academic year 2010/2011.
- Comments, graphs and figures for a 5-year period 2007- 2011.

We put particular emphasis on the destinations of Year 11 and Year 13 pupils as the most significant transition points.

Reports on all the Unitary Authority areas in Wales are available on careerswales.com as is the annual All-Wales Destination report.

We hope you find our report and commentary interesting and that it will be of some value to you in your future planning decisions.

If you require any additional information, please contact me at the email address given below or speak to your local Careers Wales contact.

Many thanks

**IMPORTANT
Please note:**

Full-time education (college) figures may include a very small number of pupils who went on to do a part-time college course (i.e. a course of under 16 hours per week) after leaving school.

Some percentages have been rounded up or down therefore totals may not always add up to 100%.

Powys Pupil Destinations 2011 – Year 11

YEAR 11 COHORT

- 1607 in the cohort, a decrease of 81 (4.8%) since 2010.
- **Gender Breakdown:** Male 51%, Female 49%; the same as 2010.

Education (see tables below)

- **Remaining in Full-Time Education** **87%**, a significant percentage rise on the 2010 figure (81%) but representing an **actual decrease** of 19 pupils, due to the significant change in the cohort size (
- **Continuing in school** **48%** (52% of girls and 44% of boys), an increase of 9 pupils).
- **Continuing in college** **40%** (39% of girls and 40% of boys), an increase of 22 pupils.

NB. Underlying these figures are significant variations between the 10 mainstream schools. Figures range from:

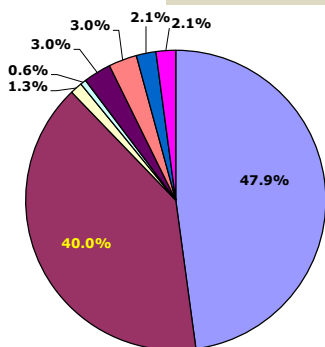

Continuing in school	32% - 65%
Continuing in college	34% - 56%

Work and Training

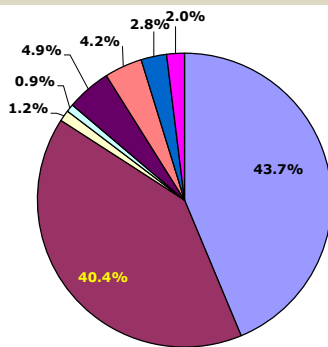

- **Entering Employment** 48 pupils, an increase from 43 in 2010
- **Entering Apprenticeships / WBT Employed status** 10 pupils (0.6%)
- **WBT, Non-employed status** 21 pupils (1.3%), down from 32 (1.9%) in 2010

Not in Employment, Education or Training (NEETs) 49 pupils (3%), the same number as in 2010 (4.1%)

5-YEAR TRENDS – YEAR 11

- The total Year 11 cohort has **dropped by over 11%** since 2007.
- The percentage of **pupils staying in education** has increased significantly from 78.6% in 2007 to 87.8% in 2011. However the figures represent a **small decrease** in numbers of 6 from 1,417 to 1,411 due to the drop in the cohort size.
- The distribution of pupils between school and college has shown some change. Around 47% have continued in school but the percentage continuing in college has increased from 32.6% in 2007 to 39.5% in 2011.
- Girls represent a **greater percentage of those continuing** in full time education than their male counterparts throughout, but the gap is not significant: 2% in 2007, 2.3% in 2011.
- The percentage of the cohort entering **non-employed Work Based Training** has decreased from 3.2% in 2007 to 1.3% in 2011 with the **actual number** entering Work Based Training decreasing from 59 to 21.
- The numbers **entering employment** have continued to fall, from 81 in 2007 to 48 this year.
- The **NEETs** figure has reduced steadily over the 5-year period from just over 5.3% in 2007 to this year's figure 3.0%. This can be explained in part by the increased numbers continuing in education and is a similar percentage to other UA areas.

5-YEAR TRENDS – YEAR 13/14

- The percentage of the cohort continuing in some form of full time education has **increased** over the period from 78.2% in 2007 to 80.5% in 2011.
- The percentage of those continuing in school and college (**rather than progressing to HE**) has increased slightly during the 5-year period. The rise of over 3% from 12.3% to 15.7% can largely be accounted for by an increase in the percentage moving from school to college.
- Progression to Higher Education in Powys has actually **dropped to a 5-year low this year** and represents a drop of 11% since a peak in 2009.
